EMERGENCY OPERATION

Upon failure of the normal utility power, an internal solidstate transfer switch automatically provides uninterrupted emergency operation for at least 90 minutes. The fully automatic solid-state, two-rate charger initiates battery charging to recharge a discharged battery in 24 hours.

BATTERY BACKUP

The MEL Series is designed with a maintenance-free 3.6V 1000mAh Ni-Cd battery that provides a minimum emergency duration of 90 minutes. Recharge time of the battery is 24 hours.
